

ARIZONA GEOGRAPHIC INFORMATION COUNCIL

ANNOUNCEMENTS

- AGIC is pleased to announce that AZGeo has modernized and will officially launch on July 1, 2020! Please visit the new AZGeo Data Hub at <https://azgeo.az.gov>. Updated functionality includes open data (available to the public without registration), access to ArcGIS Online for registered users, secure groups, and more ...
- The AGIC Education & Training Symposium has gone virtual for 2020! Join us the week of Oct 19th for hands-on training, technical sessions and more! The call for papers has been announced and the submission deadline is July 10, 2020. Submit your abstract now! More details available on the Symposium [website](#).
- The AGIC UAS WG is hosting a Virtual Fly-in! This is a two part event. Part I was June 30th, but you can still participate! Part II is July 21 from 1 - 3 PM. Additional information can be found on the [AGIC Calendar](#). The registration is closed, but you can connect to the event through the Webex link on the [agenda](#). Questions can be directed to [Kasey Green](#).
- The next AGIC Council meeting is scheduled for August 2, 2020. Check out the [AGIC Calendar](#) for details.

AGIC NEWS

Results of the 2020 AGOL Competition for Middle and High School Students

Results for the 2020 ArcGIS Online (AGOL) competition for middle and high school students are in! The competition allowed middle and high school students to submit a story map about a custom project. This year, 527 total entries were submitted nationwide. Of the 130 projects that received awards, 5 were from Arizona ...

GIS NEWS

2020 University Student and Young Professional Digital Competition

URISA's Vanguard Cabinet is pleased to announce the details for the 2020 University Student and Young Professional Digital Competition. Eligible participants must be enrolled in a college or university, be a recent graduate (spring or summer 2020), or a young or emerging geospatial professional with fewer than five years of experience.

A fifth of Earth's ocean floor is now mapped

When the Nippon Foundation-GEBCO Seabed 2030 Project was launched in 2017, only 6% of the global ocean bottom had been surveyed to resolutions below 1 km. The project recently announced that high resolution bathymetry data are now available for 19% of the ocean floor, which is up from 15% in just the last year.

Ground Penetrating Radar Mapped a Buried Ancient Roman City

Archaeologists have found a monument, market, temple, bath complex, and water pipes from the walled town of Falerii Novi
