- I. **Call to order:** Meeting was called to order at 10:02am; Introductions were made by the committee; ensure attendance list was managed and quorum established.
- II. **Approval of the May Meeting Minutes:** March meeting minutes were distributed prior to the meeting via email. Jeremy asked for a motion to approve the minutes as written. Mariah motioned and Ben seconded the motion. Motion passed unanimously without discussion.
- III. **Data Analysis Team Update:** With 80% of the pilot HUC-8 completed by the Data Analysis Team thus far, the team brought to the attention of this group their ideas for next steps. The model Ben originally ran for similarities between the data in our pilot HUC-8 would take roughly 34hrs to run for comparison across the whole state of Arizona. The goal of doing this is to simplify the data the analysis team has to work with going forward. Based on the review we have done already, a model would be able to “blow away” linework that is in sync, within an agreed upon buffer range, to leave remaining linework that requires further attention. As the team continues with their review and trialing the next steps, Mariah will update her NHD presentation for the Arizona Hydrological Symposium accordingly.
- IV. **Information or topics for future meetings:** None.
- V. **Adjourn:** Meeting adjourned at 11:00am.
